CryptoGuard OTT - End-to-End IPTV/OTT solution

The complete solution is in-house developed by CryptoGuard which ensures its reliability and eliminates complicated and expensive integration of systems and new features from third party suppliers. This makes CryptoGuard OTT a cost-effective, time saving and easy to deploy on-premise IPTV/OTT solution. CryptoGuard OTT system has superb scaling capability with a pay-as-you-grow business model, ideal for any size operator.

The solution offers enhanced viewer experience with advanced TV features such as Live-TV, Time shift, Catchup, Start-over, nPVR and VOD. CryptoGuard multi-DRM is included supporting Google-Widevine, Apple-FairPlay and Microsoft-PlayReady, enabling a highly secure content delivery. These DRM's are natively supported by the browser, mobile device or set-top box and are approved by major studios.
